ge 2 EX. B.J. 219404

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Luciano discloses an animal attraction method and apparatus.

Gimbal discloses an animal luring device with a recording and playback mechanism.

Hill et al discloses a method and apparatus for attracting fish to a selected location.

Arad et al discloses a toy telephone recording and playback device with various buttons for selecting one of the segments of recorded audio signals.

Dinardo discloses a cat calling device with a playback mechanism including a plurality of playback buttons serve to play a separate recording from a recording means.

Lau et al discloses an electronic sound generator device includes a memory bank for storing user-selectable recorded sounds.

Gaspari discloses an electronic game caller including digital vocalization storage medium for storing multiple animal calls.

2. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R.

AN Unit: 2644

§ 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.

3. Authorization for this Examiner's Amendment was given in a telephone interview and email communications with Mr. Daniel McLoughlin.

4. In the Claims:

Claims 1-25 and 48-53 have been <u>canceled</u> without prejudice nor disclaimer of the subject matter set forth therein.

Claims 26, 36, 47, 70, 78 and 87 are amended and replaced as follow:

26. A method of luring an animal to an area in an environment, the method comprising an act acts of:

(A) operating a device that includes a recording medium having first and second separately pre-recorded sounds stored thereon, wherein the first pre-recorded sound simulates a first sound made by a species of animal in the environment and the second pre-recorded sound simulates a second sound, distinct from the first sound, made by a species of animal in the environment; and

An Unit: 2644

(B)—(A) contemporaneously playing back the first and second pre-recorded sounds—that were recorded separately and that respectively simulate first and second—sounds made by a species of animal in the environment,

wherein the contemporaneous playing back of the first and second prerecorded sounds produces a combination of sounds for luring the animal.

An apparatus for luring an animal to an area in an environment, the apparatus comprising:

a recording medium storing first and second prerecorded sounds that simulate first and second distinct
sounds each made by a species of animal in the environment;
and

a controller to play back the first and second prerecorded sounds contemporaneously to produce a combination of sounds for luring the animal.

An apparatus for luring an animal to an area in an environment, the apparatus comprising:

means for storing first and second pre-recorded sounds

that simulate first and second distinct sounds each made by a species of animal in the environment; and

means for playing back the first and second prerecorded sounds contemporaneously to produce a combination of sounds for luring the animal.

39 20. An apparatus for luring an animal to an area in an environment, the apparatus comprising:

a recording medium on which is stored a first signal representing a first pre-recorded sound that simulates at least a first animal sound made by a species of animal in the environment and a second signal representing a second pre-recorded sound that simulates at least a second animal sound, distinct from the first animal sound, made by a species of animal in the environment;

a user interface including a first button to select the first signal and a second button to select the second signal;

a controller to play back contemporaneously the first and second pre-recorded sounds, in response to the first button and second button being pressed, to produce a combination of sounds for luring the animal; and

environment using a hand-held unit that houses a recording medium and a user interface, the recording medium storing a first signal representing a first pre-recorded sound that simulates at least a first animal sound made by a species of animal in the environment and storing a second signal representing a second pre-recorded sound that simulates at least a second animal sound made by a species of animal in the environment that is different than the first animal sound, and the user interface including a first button to select the first pre-recorded sound, the method comprising acts of:

- (A) controlling a simulation of the first animal sound by pressing the first button to reproduce the first pre-recorded sound; and
- (B) controlling a simulation of the second animal sound that is contemporaneous to the simulation of the first animal by pressing the second button to reproduce the second animal sound, wherein the contemporaneous playing back of the first and second

prerecorded sounds produces a combination of sounds for luring the animal.

56 pm. An apparatus for luring an animal to an area in an environment, the method comprising:

a recording medium on which is stored a first signal representing a first pre-recorded sound that simulates at least a first animal sound made by a species of animal in the environment and a second signal representing a second pre-recorded sound that simulates at least a second animal sound, distinct from the first animal sound, made by a species of animal in the environment;

a user interface including a first button to select the first pre-recorded sound and a second button to select the second pre-recorded sound;

means for contemporaneously playing back the first and second pre-recorded sounds in response to the first button and the second button being pressed to produce a combination of sounds for luring the animal; and

a hand-held unit to house the recording medium, the user interface and the means for playing back during operation of the apparatus.

5. The following is an Examiner's Statement of Reasons for Allowance:

The cited prior art discloses various system, devices and method thereof which including memory or storage medium for storing multiple or different animal sounds, and selectively playback the stored animal sounds for attracting or luring different animals. The prior art fails to specifically including means or method thereof for contemporaneously playing back the first and second pre-recorded animal sounds (distinct sounds made by a species of animal in an environment) to produce a combination of sounds (i.e., the combinations of the prerecorded first and second distinct animal sounds) for luring the The controller or means for contemporaneously playing animal. back the recorded animal sound is in response to a first button and a second button of the being pressed contemporaneously, and wherein the first button is selected to represents the first pre-recorded animal sound and the second button is selected to represents the second pre-recorded animal sound.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
